

Pacifica® Plus meets the needs of every boatyard!

Interlux Yacht Finishes
2270 Morris Avenue
Union, NJ 07083

“ We switched all 400+ boats to Pacifica Plus 3 years ago. The product is unbelievably clean and effective. It works even better than TBT based products of prior years! ”

Chuck Fullmer/Gary Skye,
Pontoon Express, Harbeson, DE

All boats, all waters, no compromises!

“ Pacifica Plus was the first paint on the yacht market of its kind, using an alternative biocide called Ecomea™. As one of its first users, Brewer Boatyards have witnessed its outstanding performance without compromise. As a result, we have switched to Pacifica Plus as our **bottom paint of choice**. Pacifica Plus is the perfect fit for our environmental targets and ambitions. ”

Rives Potts, General Manager,
Brewer Pilots Point

Pacifica® Plus

Crossover to better technology!

Pacifica® Plus – All boats, all waters, no compromises!

PROVEN TECHNOLOGY

Pacifica Plus utilizes the latest in antifouling technology with a product leading combination of Ecomea™ and Biolux® Technology. Interlux combines the power of these two biocides to provide unique, maximum protection for the boat owner.

Interlux has one of the longest track records for copper-free technologies in the industry. Pacifica Plus was the first product registered by the EPA with Ecomea™. This track record means we have predictable experience and reputation for the even the harshest fouling conditions.

Whether you are in warm or cool waters, fresh, salt or brackish, Pacifica Plus is a proven winner against fouling. The product can be safely used on all substrates of any boat.

Features and Benefits

- Copper- free ablative technology with Biolux® slime blocking technology
- Contains Ecomea™
- Fast dry, low VOC for reduced solvent emissions
- Compatible with all substrates, including wood, fiberglass, aluminum and steel
- Maximum protection with proven track record
- Ablative Technology to minimize paint buildup over time
- Excellent replacement for other mid level ablative paints and copper-free products

Ecomea™ is a trademark of Johnson & Johnson

Left: Ecomea™ only
Right: Pacifica® Plus with Ecomea™ and Biolux®

“ We started using Pacifica Plus 3 years ago and haven’t looked back since. It has completely replaced all other products for Aluminum boats in the yard. ”

Dave Tuttle/Steve Hastings, Short’s Marine, Millsboro, DE

Aluminum government power boat. Full season, New Jersey. End of season haul out.

“ Pacifica Plus is fantastic! It is easy to use and simple to switch customer over from copper based paints. It is the cleanest antifouling paint out there. We love it! ”

Ken Broman, Oak Harbor Marina Pasadena, MD

Versatility

- **Universally compatible ablative** for all boats and waters. Pacifica® Plus can be applied over other properly prepared Interlux® antifouling paints and substrates.
- **Copper-free with maximum performance.** Pacifica Plus can be used in all waters, including areas of copper bans, pressure wash restrictions, and copper reduction areas.

Sailboat hauled out after 3 months in Chesapeake Bay fouling conditions. No pressure washing!

- **Simplicity.** Excellent replacement for all other mid priced ablative antifouling paints.
- **One product does it all!** System Efficiencies – Ultimate No Sand System – Simple Pontoon System – Underwater Metals

Pacifica Plus on outdrive, 6 months, Mid-Atlantic coast

Protection

- **Protecting your integrity.** Pacifica Plus has a proven track record, longer than any other Ecomea™ based formula on the market. Only Pacifica Plus combines Ecomea™ and Biolux® Technology.

Left: Leading conventional antifouling
Right: Pacifica Plus, 12 months Chesapeake Bay

- **The environmentally friendlier choice.** You may choose to use Pacifica Plus for a whole host of reasons, but have peace of mind that the product was developed with the environment in mind. Pacifica Plus is copper-free and uses the exact amount of biocide to provide a combination of environmental intelligence and maximum protection.
- **Low VOC & fast dry technology** allows for reduced VOC emissions and quicker turn around time at haul out.
- **CROSSOVER to better technology.** If you are a boatyard, marina owner or a boat owner, CROSSOVER to better technology. Pacifica Plus offers lower maintenance costs and reduced copper emission costs from pressure washing and other regulations.
