Micron 350w
Antifouling
Premium Polishing Antifouling

PRODUCT DESCRIPTION
Micron 350w is an antifouling product effective against fouling organisms; slime, aquatic plants and animals. A Premium Polishing Antifouling suitable for professional and consumer application onto vessels in fresh and salt water. The polishing system provides up to 2 years performance, avoiding paint build up. The ever-smoothing surface ensures that drag is always minimised whilst maintaining optimum biocide release including in stationary periods. Can be applied up to 12 months before launch.

PRODUCT INFORMATION
Colour: YBB628-Dover White
Finish: Matt
Specific Gravity: 1.9 average
Volume Solids: 58% average
Typical Shelf Life: 2 yrs
VOC (As Supplied): 364 g/L average
Unit Size: 750mL, 2.5L, 5L, 20L

Note: Max. immersion times are as follows: 5-35°C - 12 months

APPLICATION AND USE
Preparation
PREVIOUSLY ANTIFOULED SURFACE
In Good Condition: All fouling and contamination must be thoroughly removed including the leached layer. Use high pressure fresh water wash (3000 psi/207 bar) and/or scraping and wet sanding with typically 80-120 grade paper. Do not dry sand. If old antifouling is incompatible or unknown, seal with suitable International Paint barrier/sealer coat
In Poor Condition: Use Interstrip to remove all traces of antifouling.
PRIMING: All preparation for bare substrates is covered on the appropriate primer datasheet.
BARE GRP: Prime with Gelshield 200 for osmosis protection, or Primoon or Interprotect.
STEEL/IRON/LEAD/WOOD: Prime with Interprotect or Primoon.

Hints
Mixing: Thoroughly stir until product is mixed to a uniform consistency before use.
Thinning: Thinning is not recommended. Antifouling performance can be compromised if correct dry film thickness is not applied.
Cleaner: YTA085 International Antifouling Thinners #3.
Ventilation and Humidity Control: Ensure adequate ventilation during use.
Other: Antifoulings should only be wet sanded. Never dry sand or burn-off old antifoulings. True colour will develop after immersion.

Some Important Points
To prevent premature failure, ensure the correct amount of paint is applied using the coverage as a guide.
Product temperature should be minimum 5°C/41°F and maximum 35°C/95°F.
Ambient temperature should be minimum 5°C/41°F and maximum 35°C/95°F.
Substrate temperature should be 3°C/8°F above dew point and maximum 35°C/95°F.

Compatibility/Substrates
For use over suitably primed GRP, Wood, Steel/Iron and lead.
Not suitable for use over Aluminium/Alloy substrates or zinc-sprayed surfaces
Can be applied direct over most types of antifoulings, provided they are in sound condition, with the exception of VC17m/PTFE antifoulings. Consult your local International Paint representative for specific overcoating advice if you are unsure about compatibility of Micron 350w over your existing coating scheme.

Please refer to your local representative or visit www.yachtpaint.com for further information.

The information given in this sheet is not intended to be exhaustive. Any person using the product without first making further written enquiries as to the suitability of the product for the intended purpose does so at their own risk and we can accept no responsibility for the performance of the product or for any loss or damage (other than death or personal injury resulting from negligence) arising out of such use. The information contained in this sheet is liable to modification from time to time in the light of experience and our policy of continuous product development.

Number of Coats

By Brush/Roller:
Apply 2 coats of 60 microns dry for 12 months (Total DFT of 120 microns)
Apply 3 coats of 60 microns dry for 24 months (Total DFT is 180 microns)

By Spray (Professional only):
Apply 1 coat of 120 microns dry for 12 months (Total DFT of 120 microns)
Apply 2 coats of 90 microns dry for 24 months (Total DFT of 180 microns)

In all schemes, apply an extra stripe coat in areas of high wear such as chines, rudders, sterngear and any leading edges.

Coverage

By Brush/Roller:
(Theoretical) - 10 m²/L per coat
(Practical) - 9 m²/L per coat

By Spray (Professional only):
(Theoretical) - 6.67m²/L per coat (for 24 months scheme)
(Practical) – 4m²/L per coat (for 24 months scheme)
(Theoretical) – 4.83m²/L per coat (for 12 months scheme)
(Practical) - 2.9 m²/L per coat (for 12 months scheme)

Recommended DFT per coat
60 microns dry per coat by brush/roller
90 microns dry per coat by spray (for 24 months scheme)
120 microns dry per coat by spray (for 12 months scheme)

Recommended WFT per coat
103 microns wet per coat by brush/roller
155 microns wet per coat by spray (for 24 months scheme)
207 microns wet per coat by spray (for 12 months scheme)

Application Methods
Airless Spray (Professional only), Brush, Roller

TRANSPORTATION, STORAGE AND SAFETY INFORMATION

Storage

GENERAL:
Exposure to air and extremes of temperature should be avoided. For the full shelf life of Micron 350w to be realised ensure that between use the container is firmly closed and the temperature is between 5°C/41°F and 35°C/95°F. Keep out of direct sunlight.

TRANSPORTATION:
Micron 350w should be kept in securely closed containers during transport and storage.

Safety

GENERAL:
Contains biocides.
Antifoulings should only be wet sanded. Never dry sand or burn-off old antifoulings.
Read the label safety section for Health and Safety Information, also available from our Technical Help Line.

DISPOSAL:
Do not discard tins or pour paint into water courses, use the facilities provided. It is best to allow paints to harden before disposal.
Remainders of this product cannot be disposed of through the municipal waste route or dumped without permit. Disposal of remainders must be arranged for in consultation with the authorities.

IMPORTANT NOTES

The information given in this sheet is not intended to be exhaustive.
